Silver Edition

V. 10/08

2x4, 3x3, & 4x4 ASSEMBLY DIRECTIONS

Assemble all **A** (corner poles) and **C** (connecting poles) as shown in the diagram. **A** poles have a female end. Set the half assembled frame aside. (See picture 1)

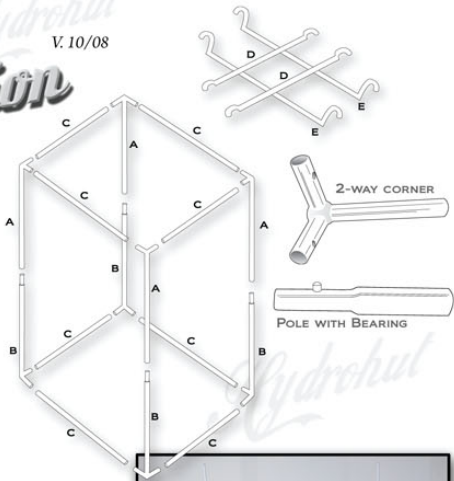

Assemble all **B** (corner poles) and **C** (connecting poles) as shown in the diagram. **B** poles have a male end.

Lift up the first section, turn it over and insert the 4 **A** poles into the 4 **B** poles to complete the frame assembly. (See picture 2)

***Note for 2x4 Silver Edition only**
The 2x4 contains two different lengths of **C** poles. The shorter **C** poles go on the left and right sides while the longer **C** poles go in the front and the back of the frame assembly as this tent is not square, but rectangular.

Locate the 4 ceiling cross members. There are 2 with taller hooked ends and two with shorter hooked ends. The 2 cross members with taller hooked ends go onto the top of the frame first. Next put the remaining 2 cross members onto the top of the frame so the 4 cross members form a # pattern.

Unfold your Silver Edition canvas and unzip the main zipper completely. This is a long zipper that will completely open up the tent.

3
Find the top of the tent canvas. The top of the tent canvas has a vent duct opening. (The bottom of the tent canvas has the half circle vents.) Start covering the frame with the top of the canvas. Slide some of the top of the canvas onto the top of the frame on one side and then move to the other side and slide a bit more. (see picture 3)

Keep sliding the canvas onto the frame until the top of the canvas is pulled squarely over the top of the frame. Make sure that all 4 corners of the canvas are pulled down squarely over each corner of the frame. (See picture 4)

4
Slide the bottom of the canvas under the frame until it reaches all four bottom frame corners. Making sure that each corner is squarely pulled onto the frame will insure proper installation and avoid any zipper tears later. (See picture 5) (See picture 6)

Zip the main zipper all the way around the tent to close the tent. Assembly is now complete. (See picture 7)

There are 4 velcro straps to hold a filter and a fan to the ceiling of your Silver Edition HydroHut
