Always use un-chlorinated water, maintain pH levels between 5.5-7.2 and check reservoir after adding all nutrients. Due to our use of multiple chelating agents in our formulas, the elements within our products can be absorbed by plants in a wider range of pH levels.

Oxygenate water before and during application. To prevent nutrient settling, always use a pump at the bottom of the reservoir to continually agitate and mix the nutrient water during application. Research and Development conducted using water obtained by reverse osmosis containing near 0 PPM.

When using re-circulating (ebb & flow) systems, Do Not Use Verde.

USEFUL CONVERSIONS	
1 teaspoon	= 5 ml
1 Tablespoon	= 15 ml
1 ounce	= 30 ml
1 quart	= 946 ml
1 gallon	= 3.785 L
1 gallon	= 128 oz
*1 teaspoon (powder)	= 2 1/3 grams (approx.)
