

iGS-011

Day or 24 h Cycle Timer with Photocell

Features

- Precise cycle timer with day/night detection
- Really easy to use
- For irrigation pump(s), fogging, misting, ventilation and other cycled processes
- Set to cycle at all times or daytime only
- Smooth rotating knobs with continuous adjustment
- ON duration from 30 seconds to 30 minutes
- OFF duration from 1 minute to 12 hours
- ON and OFF knobs are factory calibrated for accurate settings
- 120 V, 15 A, 2 HP load capacity
- CSA/UL compliant

Cycle at all times or daytime only

Useful Tips

- ▶ Plug one 1,500 W, 120 V equipment in the iGS-011 power outlet;

or

- ▶ Double, even quadruple the equipments under control of the iGS-011 by using a PLUG'N'GROW iLS4 (see pages 19, 20 & 21);

or

- ▶ Multiply your control capacity by plugging a sense cord from a load switcher box like PLUG'N'GROW iLS4-240 in the iGS-011 outlet: an iLS4-240 with a 40 A circuit breaker will feed up to 8,000 W of 240 V equipment, or up to 8,000 W of 120 V equipment by using a iLS4-120S.
