

ona

odor neutralizing agent

Problem Odors are Gone.

Don't just mask the odor.
Eliminate it permanently with **ona**.

ona is a complex formula using essential oil technology to destroy a wide spectrum of organic and non-organic odors. **ona** is non-toxic, environmentally safe and will assuredly make your odor problems disappear.

ona gel

Ona gel is formulated to evaporate a consistent amount of odor control. Simply open the lid and place in desired location. Regulate strength by exposing more or less surface to the air. **Ona gel** can be used with the **storm**, **breeze** or **odor stop** dispensers to ensure uniform distribution of odor neutralizer in the area to be treated.

ona block

The **ona block** is a fast easy way to fight odors at their source. Simply open the lid and place in room or vent. The duration of the **ona block** will vary from 15 – 30 days relative to the airflow around the block and the ambient temperature. To limit the amount of odor control and extend block life, make small holes in the cover and replace on the container.

ona liquid

Ona liquid can be added to commercial misting systems, humidifiers or simply sprayed freely into the air to control airborne odors of the entire room.

ona mist

Ona mist permanently eliminates any airborne odors, without any wet oily fallout. **Ona mist** can be sprayed manually or used with the automatic CSA dispenser.

ona aqua oil

Ona aqua oil is a floating film barrier, which when dispensed over odor polluting liquids, effectively neutralizes escaping odor molecules. Non-toxic, biodegradable & will not negatively affect typical BOD.

ona penetrator

Ona penetrator is formulated to penetrate and migrate through solid waste (50% solids and greater) and neutralize odor. Also penetrates solid surfaces like concrete & drywall.

ona

odor neutralizing agent

You can buy **ona** in 6 configurations, which when combined with our effective dispersal systems, offers powerful odor control for virtually all problems and makes them disappear.

The **ona liquid**, **gel**, **mist**, **block**, **aqua oil** and **penetrator** are available in two popular scents, **Polar Crystal** and **Fresh Linen**, both which use the same base odor neutralization technology.
